

EPAM + MARKLOGIC

A DATABASE FOR TODAY'S KNOWLEDGE UNIFIED STRUCTURED & UN-STRUCTURED

Today's enterprise traps huge volumes of data within silos in a variety of formats. Sources of data stores are widespread and include articles, papers, email, financial or transactional applications or websites UGC.

Together, EPAM and MarkLogic unify this data and enable access to the knowledge for business or technology users.

ENRICHING YOUR DATA

Concepts, Events, Topics & Themes, Sentiments & Opinions, Emotions & Perceptions and corresponding relationships and dependencies are extracted based upon text recognition and context analysis algorithms.

Skip the step of normalization and directly unify disparate content, delivering strategic insight to your users in one-third the time!

ACCESS...PEOPLE, ROLES AND INDUSTRY

Together, EPAM and MarkLogic deliver the results:

- Speed the delivery of new, more competitive products
- Enabling users to extract exactly the information they need to complete their tasks 5 to 9 times faster than before
- Reduced search results from 10 possible documents down to two precise sections or paragraphs that deliver just the right bit of content the user needs

ACTIONABLE CONTENT

Tools built by EPAM enable business users to apply targeted queries using content driven analytics, NLP and machine learning algorithms to reveal actionable insights across this unified information source.
