

# ARE YOU COMPLIANT – OR HOPING FOR AN EXTENSION?

With the January 2018 deadline looming, you need to redesign your data management and reporting strategy for MiFID II – and you need to do it fast.

## Why are you ignoring your data?

## Three Signs of Neglected Data

### 1 Difficulty Reconstructing Your Trades

MiFID II requires that your organisation provides timely reports on all data associated with a trade. You must be able to report back to the regulators what you knew and when across all communications. Non-compliance results in hefty fees.

### 2 Failing to Comply With Real-time Requests

Siloed controls and a proliferation of databases supporting the trading operations result in resource and time-intensive process to generate reports while what is needed is real-time response. The 2018 deadline will not be met unless a step change in the underlying technology is implemented.

### 3 Data Storage Costs Consuming Your Budget

Mandatory retention periods combined with inter-jurisdictional information sharing rules means you're spending millions just to store data safely. Your IT team has to spend too much time and money overcoming limitations of traditional data consolidation.

If this is your reality, you need MarkLogic® – the world's best database for integrating data from silos.

“ We need the ability to respond quickly to changing regulatory requirements. We chose MarkLogic because trade data is notoriously difficult to handle in relational databases.”

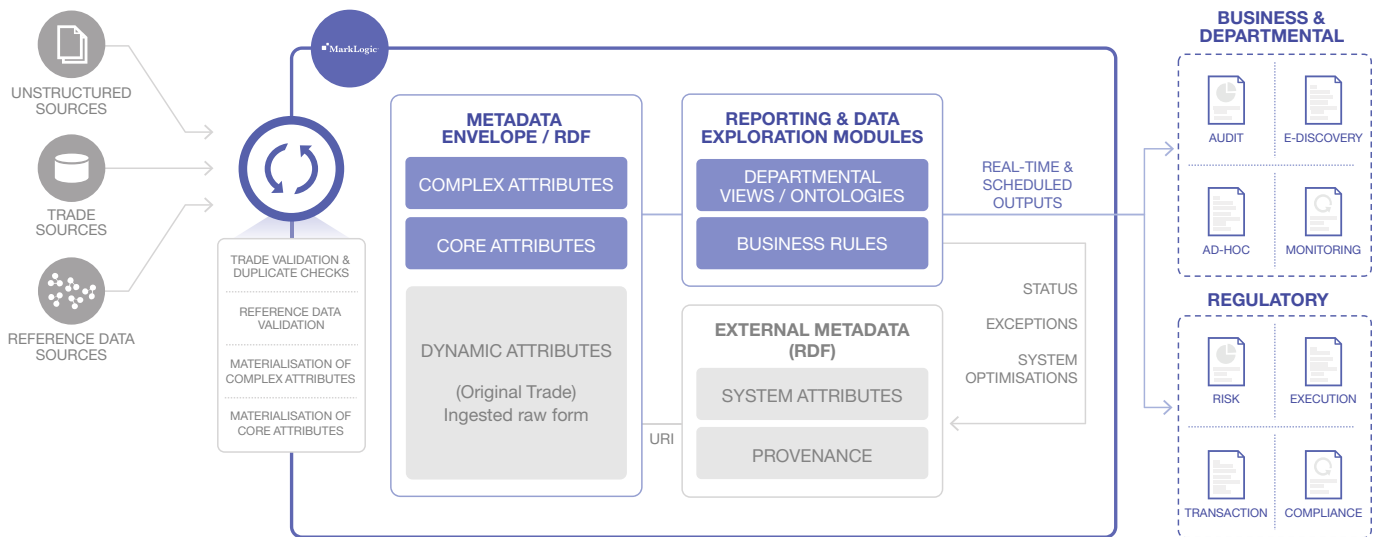

—Jaap Boersma, Principal Architect for Capital Markets Solutions, ABN AMRO Bank N.V.

## Financial Institutions Trust MarkLogic

Solving these data challenges requires a database that empowers you to integrate all of your data with minimal disruption to your business.

MarkLogic’s multi-model database does just that and also provides powerful, “ask anything” search, semantic capabilities to give you complete views of your trades, and bitemporal stamping to help you prove what you knew and when you knew it.

With support for secure operations, accurate reporting and analysis over the full lifecycle of data, the agile MarkLogic platform makes it easier to adapt to changes such as new regulations, governance and transparency standards – and enable you to meet the 2018 MiFID II deadline.

Solution Architecture for Regulatory Reporting

## Let MarkLogic Enable Your MiFID II Compliance

As the world’s best database for integrating data from silos, MarkLogic’s database platform empowers our financial services customers to meet evolving regulatory requirements – at less cost. Find out why leading organisations across the globe trust MarkLogic to solve their complex data challenges.
